16+	1,300+	140+	95
production apps shipped	commits across 9 client repos	automated test files written	database migrations in one ERP

PROFILE

Self-taught full-stack developer who builds the software real businesses run on: point of sale, inventory, procurement and booking systems. I started coding to manage my own small business, and that tool became a product. Since then I have delivered 16+ production apps end to end, from requirements and UI design to database security, testing and deployment, for a manufacturing group founded in 1987, restaurants, retail brands and service shops. Five years in sales, finance and customer service taught me to build for how owners actually work.

SKILLS

Frontend	React 19, Next.js 15/16 (App Router), TypeScript, JavaScript, Tailwind CSS v4, shadcn/ui, responsive and accessible UI
Backend & data	Node.js, PostgreSQL, Supabase (Auth, row-level security, Edge Functions, Storage), Prisma, Drizzle, Zod, REST APIs
Quality & delivery	Playwright, Vitest, GitHub Actions CI, Vercel, Lighthouse, security headers, offline-first PWAs
3D & motion	Three.js, React Three Fiber, GSAP ScrollTrigger, Lenis
AI-assisted dev	Claude Code, ChatGPT, multi-agent workflows with human approval gates and code review

EXPERIENCE

Founder & Full-Stack Developer, STRUKKD LABS
2025 – Present

Software studio for small and mid-sized businesses

- Lead developer on an inventory and procurement system for Singel Group of Companies: 557 commits, 95 database migrations and 49 test files covering purchasing through client sign-off.
- Built a release gate that blocks any deploy failing checks for console errors, forms, accessibility, SEO or security.
- Built the studio's own operations system for client intake, quotes, contracts, invoices and release tracking, plus a prospecting pipeline for small businesses in Manila, Cebu and Davao.
- Set technical direction and pricing for every engagement.

Freelance Full-Stack Developer
2023 – Present

Direct clients and small brands

- Delivered apps for restaurants, retail brands, resorts, a travel agency and a barbershop, owning each from requirements to handover.
- Hand over every project in the client's own repository, hosting and database accounts, so the client owns their software.

Sales, Finance & Client-Facing Roles
5+ years, before development

Real estate sales, financial advisory, HR sourcing, customer service

- Managed client relationships and reviewed financial statements and sales data; handled high-volume sourcing and customer communication.

EDUCATION

BS Information Technology, AMA Computer College, Biñan
2019

SELECTED PROJECTS

Singel IPMS · Inventory & procurement system singel-ipms.vercel.app

Next.js 15 · React 19 · TypeScript · Supabase · Tailwind CSS

- Purchase orders, receiving, stock movements and material allocation to jobs for a five-division manufacturing and services group.
- Traceable stock records, role permissions enforced in the database with row-level security, delivery tracking and client acceptance.

Tenda Pro · Restaurant & café operations tenda.ph

Next.js 16 · React 19 · TypeScript · Supabase · Drizzle · Vitest · Playwright

- One back office replacing paper and group chats: POS, kitchen display, QR menu, payroll and end-of-day reconciliation.
- Recipes are linked to stock, so every sale deducts ingredients and tracks cost of goods sold automatically.

Singel Group of Companies · Corporate website singelgroup.vercel.app

Next.js · TypeScript · Tailwind CSS v4 · React Three Fiber · GSAP · GitHub Actions

- Rebuilt a five-division corporate site with a WebGL hero and scroll-driven motion, with full reduced-motion support.
- Wrote seven browser checks that measure motion, scrolling, contrast, performance and layout overlap at six screen widths.

Gold Palace Streetwear & Grimez Collection · Retail systems gold-palace-streetwear.vercel.app

HTML · CSS · JavaScript · Supabase · Vercel

- Storefronts and owner tools for product drops, POS, orders, inventory, finance and reports; 64 automated test files.

Leisure Travel & Tours · Booking website and admin leisure-travel-tours.vercel.app

JavaScript · Supabase · Vercel

- Baguio staycation and tours site with an admin CMS and two-way calendar (iCal) sync to prevent double bookings.

The Drop · Retail business suite

JavaScript · PWA · Supabase Edge Functions

- Offline-first back office for a streetwear retailer: POS, inventory, delivery, payroll, P&L and receipt printing. Sales save locally and sync to the cloud through an outbox, with staff PINs checked on the server.

Courtside PH · Court reservations PWA

JavaScript · PWA · Supabase row-level security and Edge Functions

- Reservations across six sports with QR check-in, double-booking protection, offline support and an owner earnings view.

Checkout Hub PH · Offline business manager checkout-hub-ph.vercel.app

JavaScript · PWA · Dexie

- The tool I first built for my own business: eight modules in one offline-first file, with stock auto-deducted on each invoice and low-stock and expiry alerts.

STRUKKD LABS Virtual Office · 3D operations workspace strukkd-labs-virtual-office.vercel.app

JavaScript · Three.js · Node.js · Supabase · Zod

- A 3D workspace for client intake, task allocation and artifact review, where AI-drafted work needs human approval before it moves forward.
